

8. CONCLUSION

8.1 SELF- ANALYSIS AND PROJECT VIABILITY

This project is completed with the functionalities as specified earlier but then again there is lot more than this which can be done. The project is well capable to get all the information and facilities regarding one's travel plans. Much other functionality will be added to the existing features.

8.2 PROBLEM ENCOUNTERED AND POSSIBLE SOLUTIONS

- The problem encountered in designing and managing the Information, so I face many problems while working with this and interact it with the plug-in.
- User Interface
- Manage huge database
- The Part of Solution can be solved by User can get all the work done from the new UI.

8.3 SUMMARY OF PROJECT WORK

We have completed our project work using software engineering and system analysis and design approach. We have designed work with preplanned scheduling related with time constraints and result oriented progress in project development, making it easy for our users to plan their travel schedules easily without having to look at multiple different platforms.
