

1. INTRODUCTION

1.1 PROJECT OVERVIEW

Ground transportation helper portal contains all the travel schedule data so as to improve the daily management of aviation traffic around the world as for, Rail transportation facilities and locations (Address, city, pin-code and time zone). Our site allows one to route the transport be it air plane or train. Maps allow you to get all the information about the vessel travelling from one place to another. One can get the fare of the cab trip from their office to departure destination distance of the journey they want to initiate, the distance and duration will be provided on our site.

1.2 OBJECTIVE

- To let the users get their travel queries solved easily by providing all the details about the means of transport they select (i.e. by air or by rail).
- To get the accurate location about both start point and destination.
- To get information about pre-scheduled paid pick up drop facilities from different cab companies.

1.3 SCOPE

It will help users to get all the information about the airports, airlines and rail stations details on a single website. It will provide information about pre-scheduled paid pick up and drop cab to and from departure point and arrival destination.

1.4 TOOLS & TECHNOLOGY USED

Tools: Visual Studio 2015, Microsoft SQL Server.
